LIFE SCIENCES : RESEARCH & DEVELOPMENT

OUR SPECIALISATION :

Life Sciences - Research & Development

Spotting the global demand for recruitment in Life Sciences, Ideal Healthcare carved out a specialisation in this area creating capability right across the APAC region. We have a growing team of consultants focused purely on Clinical, Medical and Regulatory positions, all with significant exposure in these complex technical areas.

Our wide ranging clients include pharmaceutical, CRO, biotech, medical device and research organisations. In all cases our relationships run deep into these firms with a tried and proven history of efficient and accurate delivery. Roles are serviced via a tightly held candidate database of over 8,000 candidates in Clinical, Medical and Regulatory functions, with a powerful research engine managing this.

Our international team of consultants can speak 9 languages, to date we have placed in 11 APAC Countries from our hub in Singapore. Ideal Healthcare offers full APAC coverage with offices in Hong Kong, Singapore and Sydney. Our people are sector experts with the full suite of sector knowledge enabling them to engage intelligently with senior clients.

ABOUT US :

Ideal Healthcare

At Ideal Healthcare we believe that a recruitment company should be a specialist in their field; an expert in a niche market, able to provide a tailored, professional service to clients and candidates.

Our company was formed with that philosophy at its core, and since then we have dedicated ourselves to the healthcare industry by offering a streamlined and effective service that delivers results.

We have differentiated ourselves in these distinct ways:

- By hiring experts in specific niche areas to their customers
- By supporting those experts with a strong data, trend driven research function
- By applying sound recruitment and business methodologies developed over 14 years in business
- We are able to leverage our international platform to offer clients and candidates a truly global approach to our industry
